Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 11-17 and 21-27, drawn to "a method for reporting security situations by logging and classifying events", classified in class 713, subclass 201.
- II. Claims 8-10, 18-20 and 28-30, drawn to "a method for determining a severity level for multiple groups of computers by performing mathematical operations on a plurality of delta severity levels", classified in class 709, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as classifying and logging events for reporting security situation by storing event attributes as an event set. And the invention Group II has the utility of performing mathematical operations such as addition, arithmetic mean and geometric mean on a plurality of delta severity levels which is different from event logging and classification in Group I and it is used as a tool for establishing severity level for multiple groups of computers. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Telephone calls were made to Mr. Jeffery LaBaw on February 2-4, 2005 to request an oral election to the above restriction requirement, but Mr. LaBaw was not accessible.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement to be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abdulhakim Nobahar whose telephone number is 571-272-3808. The examiner can normally be reached on M-T 8-6.
